'This bulletin

43-0002-22,22 February 1992

1
1
1

2. **Scope.** This bulletin applies to all U.S. Army organizations, installations, activities, and the reserve components worldwide, who are users of equipment listed in the appendices.

4. **Procedures.**

a. The expenditure limits appendix is used after completion of the technical inspection and repair cost estimates (paras 6 through 9)

b. To use the expenditure limits chart in the appendices, accomplish the following:

- (1) Obtain NSN and determine the age of the end item (normally obtained from the equipment data plate, property book, or log records).
- (2) Refer to the current Federal supply catalog (C-A-L-A, Management Data List) for equipment price.

6. **Procedures.** Technical inspections for the FSC Group are to be made by a senior individual with MOS or civilian job classification specific to the item being inspected under procedures established by TB 45-0140. The inspection report will include details and malfunctioning components and an estimate of the cost to place the equipment in standard operating condition. The objectives of the technical inspection are:

- a. To determine the economical reparability of Army material;
- b. To graduate the loss of material to the Army solely on the basis of the age of the material;
- c. To make uneconomically repairable equipment eligible for disposal from Army inventory, and to prevent the execution of uneconomically repairable equipment for repair unless specifically required and directed.

rectly to you

Section II. ONE-TIME REPAIR EXPENDITURE LIMITS

(3) Expenditure Limitation is arrived at by multiplying the current price by the applicable percentage derived from the appropriate column in appendix A, B, C, or D of this Bulletin.

5. **Expenditure Limits.** One time repair expenditure bands are tested in appendices as follows-

- FSC Class 7910 - Appendix A
- FSC Class 7920 - Appendix B
- FSC Class 7930 - Appendix C
- FSC Class 7980 - Appendix D

Section III. MECHANICAL INSPECTIONS

7. **Forms.**

- a. DA Form 2404 (Equipment Inspection and Maintenance Worksheet) will be used to record results of technical inspections. Refer to TB 45-0140. Instructions on preparation and use of this form are found in DA Pam 730-750.
- b. DA Form 3580 (Repair Eligibility Data Sheet) will be prepared for items that are evaluated for depot maintenance or reported as uneconomically repairable.

Section IV. COMPETITION OF REPAIR COST FEATURES

a. **Cost Features.** Refer to AR 750.1 when competition costs are estimated.

b. **Standardization.** Technical competition will be conducted in accordance with

Section V. DISPOSITION INSTRUCTIONS

10. Eligibility of Materiel for Evacuation to Depot Maintenance.
- All items covered by this bulletin are eligible for evacuation to depot maintenance when the technical inspection performed indicates that repairs required are not authorized and/or exceed general support maintenance capabilities and not exceed one time repair expenditure limit.
 - Depot maintenance of all end items contained in this bulletin at oversea installations is the responsibility of Major Oversea Commanders and will be accomplished with existing facilities, personnel and equipment with appropriate augmentation when required, or by contract.

11. Disposition Instructions

- When an item requires repair beyond General Support Maintenance capability. Depot repair is authorized in oversea commands without referral to the N MCP, provided cost of repair is within the expenditure limits established in the appendices to this bulletin.
- Field Commanders are authorized to waive expenditure limits under the conditions and within the limits established in AR 750-1.
- When the estimated one time repair cost exceeds the expenditure limits prescribed herein and waiver of limits is not authorized, the equipment will be disposed of in accordance with AR 755-1.
- Request for disposition instructions will be prepared in accordance with AR 755-1. Attention is called to reporting requirements for both CONUS and oversea installations in paragraphs 1 through 5i for all principal items of equipment.

e. Reports of unserviceable excess stock on DD Form 1348 number M-3 (DOD Single line item Detail Billing Card) will be accompanied by a completed DA Form 3590 for each major item.

f. Equipment will not be disposed of solely on the basis of overage. Equipment that is in need of repair will not be disposed of unless:

- The priority of the organization mission warrants a replacement; or
- The estimated one time repair cost exceeds the ten percent expenditure limitation.

Note: Recommend the policy of programming funds for procurement of new equipment by installations be continued to prevent overstockage of obsolete equipment.

g. Disposition of items in CONUS Depot stock will be determined by the N MCP.

h. Equipment for which the estimated repair cost exceeds the maintenance limits will be reported to the N MCP for disposition instructions. No action will be taken to repair or dispose of the equipment until directed by the N MCP.

12. References.
