THE GUARDSMAN
AND HIS FAMILY
How to Properly Protect the Families of the Citizen-Soldiers
FROM "ARMS AND THE MAN"

The commanding officer of a new war machine should always have the efficiency of one of his men. Regular military drill leaves nothing to be desired there. The men are well drilled, but the efficiency of the command is not so well established. It was the custom, in the old military organization, to have the captain drill the regiment, the company and the platoon. The soldier would drill the squad, the platoon, the company and the regiment. This is not so in the new system, but the efficiency of the command is not so well established. The soldier is not well trained, but the efficiency of the command is not so well established.
