(NGB) standards (and where applicable those requirements of the Master Cooperative Agreement between the NGB and the DMNA), as well as agency and labor contract duties and responsibilities – current and as amended. The position may report to state and/or federal supervisory personnel.

Duties and responsibilities may include but are not limited to the following:

- Repair, maintain, install, inspect and test all electrical systems and equipment such as motors, transformers, wiring, switches, alarm systems, traffic controls, elevators, small appliances and related equipment in accordance with building codes, safety regulations and appropriate policies and procedures.
- Operate electrical test equipment such as ammeters, volt meters, ohmmeters, oscilloscopes and other applicable test equipment.
- Working knowledge of all applicable electrical standards, building codes and safety regulations.
- Ability to read circuit diagrams, architectural blueprints, generator and motor control diagrams.
- Authorized lockout-tagout user.
- Plan, design or sketch the layout, location and installation of wiring and equipment according to building codes and safety regulations.
- Locate and determine electrical malfunctions using test instruments and performs required repairs.
- Test electrical equipment such as generators and heaters for safety and efficiency using standard test equipment and by observing functions.
- Inspect circuits and wiring for specified shielding and grounding and repairs and rewires system according to building codes and safety regulations.
- Install fixtures, motors and electrical equipment.
- Replace bearings in motors.
- Repairs and maintains mechanical, pneumatic, hydraulic or electrical components of electrical equipment and controls using standard tools, gauges and procedures.
- Plan, layout, install and repair wiring, electrical fixtures, apparatus and control equipment.
- Plan new or modified installations consistent with specifications and electrical codes.
- Prepare sketches showing location of all wiring and equipment or follows diagrams or blueprints.
- Connect wiring to lighting fixtures and install control and distribution apparatus such as switches, relays and circuit breaker panels.
- Test, adjust, calibrate and maintain a wide variety of control equipment including central heating plant controls, building heating, air conditioning and ventilating equipment, controls for laundry equipment, controls for refrigeration and for a wide variety of other equipment and systems.
- Test continuity of circuits to ensure electrical compatibility and safety of all components using standard test instruments.
- Observe functioning of installed equipment or systems to detect hazards and the need for adjustment or replacement.
- Prepare plans of action based on verbal and written instructions.

- Prepares and maintains written records of work performed and accounting for labor and materials used. Written progress reports, following a prescribed format may sometimes be needed when a project is under way.
- Climb ladders and work from scaffolds, platforms and lifts.
- Lift heavy objects, bend and reach for extended periods of time.
- Read and interpret facility and grounds plans, specifications, manuals and blueprints.
- Working knowledge of any and all computer software related to the trade specialty.

### **DUTIES AND RESPONSIBILITIES (GM)**

Duties and responsibilities may include but are not limited to the following:

- Work from verbal or written descriptions or from drawings or sketches to design, plan, layout and complete a variety of general trades projects.
- Monitors and inspects work in progress and upon completion to ensure compliance with relevant guidelines, codes and regulations, proper use of materials and equipment; and adherence to schedules are met.
- Knowledge of general shop and trades equipment and machinery.
- Assist with determining facility and grounds maintenance needs and make recommendations for repair/correction/resolution.
- May draw rough sketches or prepare plans to scale from verbal or written instructions to accomplish a project.
- Review in-housework requests and visit jobsite to determine materials needed to complete projects.
- May conduct inspections of the facility to determine maintenance needs and recommend priorities for repair based on the nature of the maintenance problem.
- Provides supervisor with recommendations for the type, quantity and quality of materials needed to accomplish a project.
