

STATE OF NEW YORK
DIVISION OF MILITARY AND NAVAL AFFAIRS
330 OLD NISKAYUNA ROAD
LATHAM, NEW YORK 12110

VACANCY ANNOUNCEMENT #25-48

CLOSING DATE: CONTINUAL UNTIL FILLED

VACANCY ANNOUNCEMENTS CAN BE CLOSED 15 DAYS AFTER THE ORIGINAL POSTING DATE

This position is not in the Classified Service of New York State but is covered under New York State Military Law. If selected, current Civil Service employees will lose their seniority within the Classified Service, thereby exempting them from applying for promotional exams within Civil Service.

POSITIONS TO BE FILLED PENDING AVAILABILITY OF FUNDING.

Title:	Information Technology Specialist 2
Locations:	New York State Division of Military and Naval Affairs (DMNA): Latham Headquarters <ul style="list-style-type: none">• Directorate of Technology and Information – (1 vacancy)
Salary Grade:	SG-18
Salary Range:	Current Start Rate: \$70,543* Job Rate: \$85,138 (*All hires begin at "Start Rate" unless prior state experience affords eligibility for hiring step increase as determined by OSC.)
Duties and Responsibilities:	<p>Information Technology (IT) Specialists perform or assist in performing technical and agency program support IT activities related to network and system design, configuration, maintenance, and security; customer support; business/systems analysis and design which may include website development and administration of a transactional, dynamic, or interactive website; and the design, development and administration of database systems. Will assist in the administration and operation of distance learning technology to include video and audio conferencing in agency facilities across the state by serving as the initial level of support for customers in the field and for monitoring of the network. May respond to questions for assistance and coordinate repairs beyond what he/she is able to troubleshoot at their level. The incumbent answers general IT questions, resolves problems, installs hardware and software, provides system access and performs a variety of other activities related to user support in the IT environment.</p> <p>The position perform responsibilities in accordance with all current and amended, DMNA policies and procedures, federal and state statutes, and where applicable, the collective bargaining agreement and requirements of the National Guard Bureau (NGB), specifically the Master Cooperative Agreement (MCA) and supporting regulations. The position may report to state and/or federal supervisory personnel.</p>

Responsibilities may include but are not limited to the following:

- May supervise Information Technology Specialists 1, Grade 14; Information Technology Specialists 1 (Programming), Grade 14; and Information Technology Assistants, Grade 12 and other subordinate staff. The supervisory function includes such activities as providing technical direction on specific tasks and completing supervisory duties such as approving time off; approving timecards; and completing performance evaluations.
- Performs the more complex user support tasks.
- Develops or assists in developing Help Desk/User Support procedures and user reference and instructional materials. Ensures procedures and policies are implemented according to requirements.
- Collects information needed for new hardware/software installations or modifications to existing configurations including all necessary support for infrastructure.
- Participates in meetings and works with agency management, users, vendors, consultants and IT staff to discuss and identify IT solution options, assists with resolutions and recommendations for appropriate system platforms for meeting program requirements.
- May assist with various design activities such as creating program specifications, work flow diagrams or structured charts, and logical data models.
- May participate in the testing phase of application development such as assisting in the development of test plans, test conditions and validation testing.
- Develops, prepares, and assists with documentation preparation for the system, including run books for computer operations staff, procedural manuals and on-line help instructions for users, and technical documentation manuals for IT staff.
- Performs installation, administration, testing, and maintenance of hardware and software.
- Plans, executes, and performs quality assurance measures on system user acceptance tests of programs and systems.
- Establishes and configures cabling connectors, interfaces, electrical grounds, and communication data line connectors.
- Runs diagnostic software to ensure equipment operates properly and takes appropriate corrective action when required.
- Installs, configures or customizes hardware and software and ensures the configuration meets system requirements.
- Ensures that repair and preventative maintenance procedures are followed for the agency's hardware and software.
- Responds to user "help desk" requests or referrals of computer related problems.
- May coordinate with vendors in the installation, administration, testing, and maintenance of hardware and software.
- Uses utility programs to analyze and solve problems with production runs.
- Installs, configures and optimizes network hardware and software.

- Operates network and systems management software to identify problems and administer pre-defined fixes, while referring complex network issues through the appropriate escalation process.
- Utilizes identity and access management software to create and manage user identities and to provide access to system resources.
- Administers or assists in administering security software and hardware such as intrusion detection software and firewalls to meet agency security procedures and policies.
- Assists in determining, acquiring, and/or developing curriculum for hardware and software solutions.
- May provide and administer IT training to individuals or groups in hardware and software technologies. Evaluates training effectiveness.
- Assists in the preparation of procurement materials such as Requests for Proposal and evaluation of proposed solutions.
- May coordinate with vendors in the selection process for hardware, software, and maintenance solutions.
- Compares specifications and descriptions of new hardware and software packages to determine if the acquisition is appropriate to meet business needs; and recommends the acquisition of new hardware, software, and maintenance services.
- Analyzes proposed applications to determine if they would require new hardware or software.
- May coordinate in the development, planning, deployment, configuration and maintenance of networked systems.
- Operates network and systems management software to identify problems and administer pre-defined fixes, while referring complex network issues through the appropriate escalation process.
- Assists in the development of enterprise information security procedures and protocols.
- Configures or assists in configuring encryption software products to systematically encode and decode data to avoid unauthorized access.
- Assists in the selection, deployment and maintenance of antivirus software.
- Administers or assists in administering security software and hardware such as intrusion detection software and firewalls to meet agency security procedures and policies.
- Monitors the use of the security system to detect violations and report breaches through the appropriate escalation process.
- Trains other IT staff and unit points of contact (POCs) to diagnose and resolve user problems.
- Ensures tracking and resolution of user system problems.
- Prioritizes the order of pending problems and schedules installations.
- Provides reports from problem log regarding volume and response time.
- May represent the department at various IT related meetings.
- Will complete and attend training as required.
- Periodic overtime may be required.
- Periodic travel will be required using various modes of transportation.
- Performs other duties as assigned.
- Must be proficient in Microsoft Office Suite.
- Must have strong organizational skills.
