4) LOGISTICS:

a. The LC 351 trailer has been repaired.

b. PB 301 is NMC due to failure in the powerhead of the starboard Verado engine. We have returned this vessel to the maintenance facility in Leeds for work. The failure of this engine is timely as we are currently in the process of acquiring replacement 300HP SeaPro motors for both PB 300 and PB 301.

c. We have replaced PB 301 at Jones Beach with PB 281.

d. Verizon Connect Reveal tracking devices continue to give us problems. We have called for tech support and they have sent us replacement devices. Since we have a manpower shortage in the N4 shop, Verizon will send a techrep from ME Installations to perform the install on 2 December at Leeds for those boats located there.

e. We have received replacement seating for PB 300 and PB 301. The installation has been completed on PB 300. Here is the before and after:
